

Introducing the New Generation

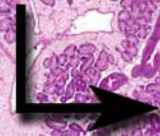

PathScan Enabler IV

Obtain Ultra High Resolution Images from 1 x 3 glass tissue slides in about a minute . . .

Without a microscope!

Tissue Slide

The New PathScan Enabler IV is a perfect compliment to any microscope imaging workstation. Thousands have been sold since the original design of 1995!

The PathScan Enabler IV is designed to allow scanning of whole mounted histological samples attached to standard 1 x 3 inch cover slipped glass slides. The PathScan Enabler IV solves low power, large field of view, high resolution imaging problems. Scan area is 1.423 x 0.85 inches, resulting in ***stunning, incredible images up to 10,248 x 6120 pixels!*** The PathScan Enabler IV holds two (2) 1 x 3 inch glass slides and includes simple use one touch QuickScan software, as well as SilverFast Ai software for advanced users. Image files can be saved in a variety of formats including TIFF, JPEG, GIF, etc.

Compatible with Windows based PC's ONLY.
